Xavier Rigau Jimenez, Mobile Developer
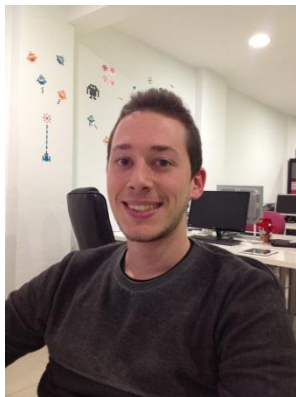

INFORMATION

I was born on April 1st 1990 in Barcelona, Spain.

C/ Francesc Moragas, 66, 5º A, Manresa, 08241 (Barcelona).

me@xavirigau.com — (+34) 653 287 301 — Skype: x.rigau

@xrigau — http://xavirigau.com — http://linkedink.com/in/xrigau

I have a valid Spanish driving license and my own car.

I'm Catalan and Spanish native speaker and speak English fluently.

GOALS

My goal is to become a great and efficient mobile software developer.

I'm an active person. I always try to know what's new in mobile development and try to go to events, tech talks and participate in Android online development groups as much as I can. Recently, I had the chance to take part of a hackathon to create apps that encourage people to recycle more in Barcelona and won the second prize.

Actually, I'm learning C++ (for Android NDK and BB10) and Objective-C (for iOS/Mac OS X).

EDUCATION

2008 — Late 2013: Computer Science (Universitat Autònoma de Barcelona)

In order to obtain the degree I must finish free elective credits (5 remaining out of 21). My plan is to finish them during August/September 2013. Some courses I've already taken are Introduction to Java (22'5 h), Introduction to Web development (22'5 h), Introduction to Android (45 h), Web Marketing (22'5 h), Entrepreneurship (30 h), Introduction to Games development with XNA (22'5 h) and English level B2.2 (150 h).

EXPERIENCE

December 2012 — April 2013: Mobile Developer (NO2 web and mobile applications S. L.)

I was part of the Strawberry SDK (cross-platform framework for Android, iOS and Mac OS X) development team. I worked to improve Strawberry SDK, mainly focused on the Android (SDK and NDK) and Mac OS X part. I also created a beta version for Blackberry 10 OS. In addition I implemented Google and Amazon's In-App billing in some games.

October 2010 — December 2012: Android Developer (Tempos 21, AtoS Group)

In Tempos 21, I took part of many projects, most relevant ones are: blueKiwi for Android (enterprise social network), mCatalog (virtual product catalog for Android tablets), and other projects such as Travel Club App, A prop d'aqui, BCN Cultural, Mi Condis, etc. Additionally I contributed to the blueKiwi for Blackberry application.
